* GHz denotes microprocessor internal clock speed; other factors may affect application performance.

† Hyper-Threading Technology requires a computer system with an Intel® Pentium® 4 processor supporting Hyper-Threading Technology and an HT Technology enabled chipset, BIOS, and operating system. Performance may vary, depending on the specific hardware and software in use. For more information, including details on which processors support HT Technology, go to http://www.intel.com/info/hyperthreading/.

‡ GB means one billion bytes when referring to hard drive capacity. Accessible capacity may vary.

** Installation of a second hard disk drive (maximum size up to 200 GB [7200 RPM]) is an available hardware option.

†† A portion of the Hard Disk space is reserved for recovery partition.

‡‡ The amount of installed memory and speed varies, depending on the hardware configuration purchased.

***Maximum speed for faxing is 14.4 Kilobits per second (Kbps). Your modem is capable of downloading at 53 Kbps using 56K/V.90. Your online service or Internet Service Provider may not support this technology or operate at this speed.
